A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 27, 2002 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwartz et al. patent of record.

The Schwartz et al patent states on col. 4, lines 55-60 that "the present invention relates to novel steroids which are useful as cancer-preventive agents ... diseases and lines 66-67 "the present invention provide novel steroids of the general formulae:"

The patent on col. 5, formula 11 wherein  $R_{1-4}$ , 6-9 and 11-19 are hydrogen and  $R_5$  is lower <sup>*alkoxy (see lines 15-30) not read on the*</sup> instant claimed compounds. The patents on col. 7 teach "tablets ... capsules (line 18). The patent does not teaches applicant's compounds per se but do teach than generically. Therefore, one skilled in this art would find ample motivation from the prior art supra to employ the prior art compounds for treating cancer in the form of a tablet on capsule with a reasonable expectation that said compounds would be effective to combat said cancers.

Claims 15-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The formula in claims 15-18 should recite "RO-" and not "OR". Correction is required.
